

WTS

Web Tracking System

Track Inbound Packages and Business Assets at Any Time, and Anywhere

Quadient provides the tools you need to automate and manage your operations. Whether it is by tracking the chain of custody of inbound packages or managing the logistics of your business assets, WTS by Quadient gives you the visibility needed to help simplify and better manage processes in your organization. Available as either a cloud-based or on-premise software solution, Quadient has a Web Tracking System to help meet your preference and business requirements.

- 1 Receive**
Scan the carrier tracking number on incoming packages, select the recipient, and enter any other data required.
- 2 Deliver**
Choose the fastest internal delivery route based on recipient location.
- 3 Confirm**
Capture recipient signature upon delivery.

Never Lose Another Inbound Item Again

Moving mail and packages is a two-way street. Outbound traffic is only half the story. When receiving important mail, packages, and other inbound items requiring proof of delivery at your facility, the tracking process starts all over again. Manual processes are time-consuming, labor-intensive, and error-prone. With WTS, you can track and monitor the internal movement and complete chain-of-custody for every piece of accountable mail that your company receives.

Designed for businesses of any size, WTS provides numerous convenient services to automate all of your inbound delivery requirements. It helps to improve the management of your company's internal delivery process by increasing reliability, accelerating productivity, and decreasing costs.

Quadient Web Tracking System

Know Where Each Asset is Located

Tracking accountable mail and packages is only part of the story. WTS' Asset Tracking Module enables you to track the internal movement and location of your organization's physical corporate assets. Catalog, track, and trace items such as electronic equipment, software licenses, furniture, tools, office supplies, and much more.

WTS will display the item description, location, date received, serial numbers, physical condition, movement, identification of the employee who moved it, and the signature of the employee who has custody of the item. WTS provides the details you need to pinpoint the location of assets in real time and manage your work location with confidence, all from your computer.

Quadient has a WTS Deployment Solution to Help Meet Your Needs

WTS (Cloud-based)

Quick and effortless to install and maintain, WTS provides the economies of scale that makes cloud computing so attractive. All you need is a PC with an Internet browser. No servers, database licensing, data backups, or extra IT services required.

WTS-P (Premise)

For clientele that prefer a premise-based solution, WTS-P is available in three product levels including Basic, XE, and Enterprise Solutions. Canon U.S.A.'s knowledgeable sales team will help determine the WTS-P solution that best fits your company's requirements.

WTS Key Features
