

Scanning from uniFLOW Online to iManage Cloud

uniFLOW Online users can now scan documents directly from any supported Canon device to iManage Cloud.^{1,2} iManage Cloud is a document management system with a strong presence in the legal market and is used by accounting firms, healthcare businesses, and financial institutions for storing, organizing, and managing documents, email, and related content. Integrating uniFLOW Online with iManage Cloud allows for great productivity by simplifying the process of scanning information into iManage Cloud.

Why Scanning to iManage Cloud Matters

Legal Industry

Scan case files, contracts, and other legal documents directly into iManage Cloud.

Accounting Firms

Help organize client files efficiently and streamline workflows to help your firm run smoothly.

Financial Services

Help protect your important business information with the ability to save and store as encrypted PDFs.

Advantages of Integrating uniFLOW ONLINE and iManage Cloud

Help Improve Workflow Productivity. Using a cloud-based scanning solution like uniFLOW Online with iManage Cloud can positively impact daily work processes by delivering enhanced and simplified scan workflows.

Easy File Retrieval. With an iManage Cloud scan profile, you can now scan directly from uniFLOW Online into workspace repositories for each client, making data accessible and more easily shared with colleagues.

Help Reduce IT Involvement. As a cloud-based solution that does not require customers to manage on-premise servers, uniFLOW Online is easy to manage and deploy.

Workspace Browsing. On a compatible device, you can browse your workspaces using uniFLOW Online to place documents in the correct folder to facilitate organization.
