

WA10 Network Adapter

WA10 NETWORK ADAPTER

Create Ethernet and Wi-Fi® network connectivity with the WA10 and a compatible imageFORMULA document scanner.* When connected to a compatible imageFORMULA document scanner,* this network adapter provides the ability to share a scanner in an office environment and scan from desktop applications. The Wi-Fi connection also allows users to initiate a scan from a mobile device, such as a tablet or smartphone, using the Canon CaptureOnTouch Job Tool app.**

Network Connectivity

The WA10 creates a network connection that allows multiple users to share access to a single, compatible imageFORMULA document scanner,* through either wired Ethernet or a Wi-Fi connection. The network connectivity also allows a user to scan, create a digital file, and then send the file to a network folder directly from the compatible document scanner without using a PC.

Simple, Flexible Design

The compact design of the WA10 can fit easily next to the existing scanner, even in small spaces. The WA10 also uses the existing scanner's power supply, saving workspace and reducing clutter.

Customer Care

A one-year Advanced Exchange warranty is included.

WA10 Network Adapter

Specifications

Interface

Scanner:	USB 2.0 Hi-Speed
