

WHIZ FOR K-12 SCHOOLS

Common Challenges

- ✓ **Innovation:** You're constantly innovating to increase agility to react and respond to the limitations of traditional K-12 custodial models post pandemic.
- ✓ **Student Experience:** You're evolving to meet—and exceed—the expectations of both students and parents. Identifying activities that can be intelligently automated can free up more time for additional high value disinfection, making for a cleaner environment.
- ✓ **Dependable Workers:** It's difficult to find reliable people these days, which can lead to lapses in housekeeping and maintenance.
- ✓ **Labor Shortages:** Custodial and cleaning jobs remain vacant at K-12 schools as administrators struggle with filling and keeping employees in these staff positions due to competitive wages in other similar industries.

The Solution

How Whiz Can Help

Schools across the country have deployed Whiz in their libraries, administrative buildings, hallways, and sports facilities. These are just a few of the advantages:

- On-site staff can easily operate the device on a daily basis, including startup and programmed runs and the management of consumables and maintenance.
- Leave it to the experts. Canon's change management expertise allows for seamless integration of Whiz into your existing programs for health and safety.
- Get tailored analytics and performance on demand.

THE BENEFITS OF WHIZ IN EDUCATION

Investing in Whiz not only provides cleanliness benefits to students and faculty, it can also help contribute to streamlined workflows and greater operational efficiencies.

**8X
LESS**

A Global SoftBank Robotics Study¹ found that there are approximately **eight times less airborne dust and allergens** kicked up by people after using Whiz as compared to manual vacuuming.

**25%
MORE**

According to a customer, Whiz helped to **boost efficiency up to 25%** through automation of repetitive tasks.²

“These autonomous vacuums work as a staffing supplement, taking care of some of the more monotonous jobs, allowing our skilled staff to take care of more essential tasks.”

– Trhile Brown, Operations Supervisor, Custodial Services at [Michigan State University](#)

How to Integrate

Redirect the efforts of outsourced cleaning services by leveraging onsite staff to manage daily vacuuming operations and maintenance, receive customized reporting, and help drive digital transformation.
