

WHY CANON FOR MANAGED IT SERVICES?

BECAUSE YOUR IT DESERVES MORE.

We offer a comprehensive suite of Managed IT Services, helping customers reduce operating costs and improve infrastructure efficiency. Canon's legacy of innovation, combined with the expert support of Supra ITS, a Managed IT Services Partner, helps businesses of all sizes stay secure, minimize downtime, and maintain control, over their IT environment. Customers can now experience the Canon difference in Managed IT and Cybersecurity with a single provider.

The Power of NSOC

Our Network Security Operations Center (NSOC) helps to protect your organization and keep your operations running smoothly by unifying Managed IT and Cybersecurity offerings, under one roof. This helps to eliminate costly delays, confusion, and potential risk.

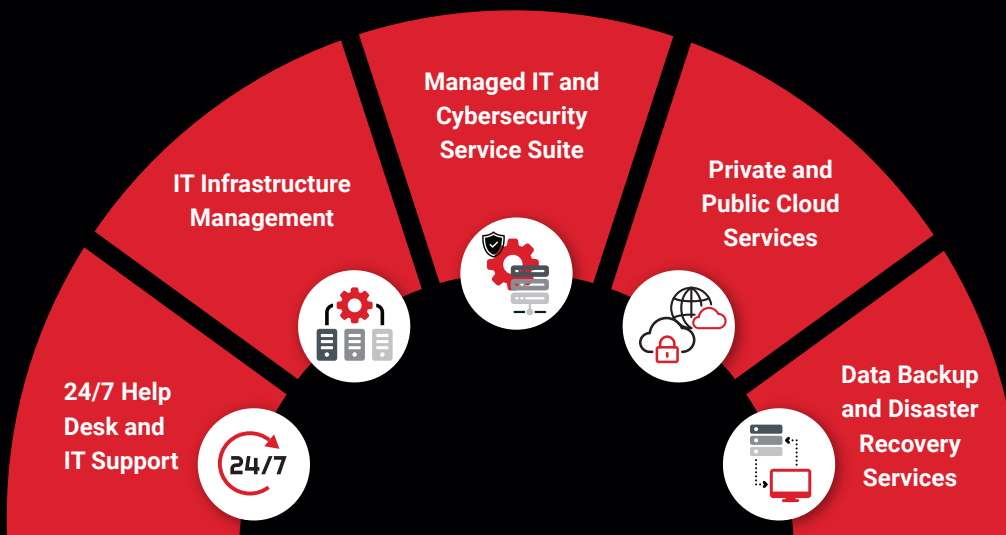

Streamlined Vendor Management

Existing Canon U.S.A. customers can consolidate vendor management by leasing and managing both office equipment and Managed IT Services from one vendor, through Canon Financial Services. This unified approach helps reduce complexity, improve billing transparency, and strengthen vendor relationships.

Compliance Made Simpler

Backed by top industry certifications such as ISO 27001 and SOC 2, we help organizations simplify the path to compliance—without complexity and excessive cost. Our expert guidance makes it easier to meet regulatory demands with confidence.

24/7

24/7 Help Desk and IT Support

Downtime doesn't keep business hours. Our help desk is available 24/7/365 with highly experience level 2 and 3 technicians on call to support you in solving issues quickly and effectively. We monitor, patch, update, and resolve problems before they become big ones.

IT Infrastructure Management

We can proactively monitor your servers, storage, and networks to catch issues before they escalate into major problems. This helps to keep your systems and team running at full speed.

Managed IT and Cybersecurity Services Suite

We deliver enterprise-level security, tools, and support to your organization without the commitment of a big budget. Our bundle includes 24/7 help desk support, server and network management, mobile device management, up to 1 TB of secure backup, advanced threat detection (MDR/XDR), and real-time monitoring and response.

Private Cloud

Gain complete control of your cloud environment with committed resources that come at a consistent and predictable cost. Our Private Cloud service supports you with dedicated servers and storage, backed by 24/7 monitoring and daily backups.

Public Cloud

If you're looking to tap into the power of Microsoft Azure, AWS, or Google Cloud, our Public Cloud service offers expert oversight, cost monitoring, security updates, reporting, and more to help you maintain focus on what's most important.

Data Backup and Disaster Recovery Services

Don't wait for disaster to strike. Help minimize downtime and disruption and protect your organization's data with backup systems, off-site storage, and established recovery plans.
