Description of additional activities for EPEAT RSC 7.3.3 Criteria

In order to meet EPEAT RSC 7.3.3 criteria, Canon Inc. took the following actions in addition to "Step 2" in "4. RCOI and Due Diligence" described in Canon Inc.'s "Responsible Minerals Sourcing Report(3TG) 2024" which has been verified by a third-party audit and disclosed on 2025/6/30.

- For parts and materials comprising EPEAT registered products and customer-specified products, Canon additionally requested Canon's primary suppliers of these parts and materials that reported smelters that were not "Conformant" or "Active" under the RMI's audit program "Responsible Minerals Assurance Process (RMAP)" to recheck the status of 3TG by using the CMRT and switch to RMAP "conformant" or "active" smelters.
- As a result of this additional request, we received reports of the completion of the switch to RMAP "Conformant" or "Active" smelters or the completion of the 3TG status review by using the CMRT.
- Canon compared the smelters or refiners("SOR") identified through the above additional actions against the list of the SORs which have been assessed as RMAP "Conformant" or "Active" smelters.

As a result of these additional actions, 228 smelter were identified as RMAP "Conformant" and 3 smelters were identified as RMAP "Active". The remaining 21 smelters were neither RMAP "Conformant" nor "Active" and which means they are RMAP "Nonconformant" smelters.

The following appendix contains a list of these smelters with RMAP status information.

Appendix.

List of SORs that are believed to be in Canon's supply chain who were RMAP Conformant, Active, or Nonconformant as of May 9, 2025.
