

Why Choose imageRUNNER ADVANCE DX?

Advanced Technology Highlights

Built for Reliability
Several models of the imageRUNNER ADVANCE DX Series feature an anti-loosening welded frame, which are designed to help device strength and durability. Earning the BLI 2022-2024 Most Reliable A3 Brand Award from Keypoint Intelligence, the imageRUNNER ADVANCE product line is synonymous with quality and reliability.

Built for Ease of Use
All imageRUNNER ADVANCE DX devices feature a large 10.1" responsive and intuitive touchscreen, making operation clear and virtually seamless. The interface remains consistent across all models, allowing work to proceed effortlessly and with a minimal learning curve.

Built for the Future
All imageRUNNER ADVANCE DX models feature Unified Firmware Platform (UFP). This common source code allows for regular updates to add new features, functions, and security measures.

Print & Scan Solutions

A comprehensive cloud-based solution which can help:

- Reduce overall print costs
- Increase document security

A convenient application to connect with the following cloud services for print and scan:

- Email
- Dropbox™
- Microsoft Teams™
- One Drive
- Box™
- Google Drive™*
- SharePoint Online™
- OneDrive for Business™

**Available in 2024.*

Advanced Security Features

Verify System at Startup

Once turned on, this feature verifies that the device boot process, firmware, and applications initialize at startup, without any tampering by third parties.

Trellix

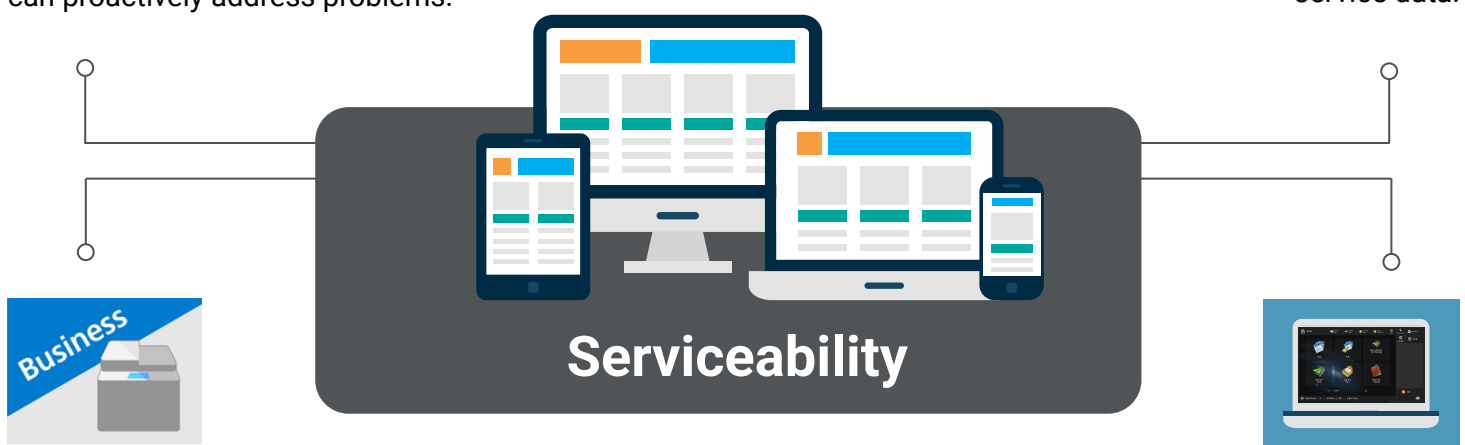

Blocks the execution of malware through whitelisting, and tampering of existing firmware and applications.

imageWARE Remote

This feature delivers meter information and notification of errors, jams, and alerts by e-mail to the service provider so that they can proactively address problems.

Remote Services Suite

Gives authorized dealer service technicians direct access to equipment service data.

Canon PRINT Business App

Remote operation feature allows the user to control the imageRUNNER ADVANCE DX user interface from a compatible smartphone or tablet without having to touch the control panel.

Remote Operator's Kit

Allows the user to control all imageRUNNER ADVANCE DX device functions from a network-connected computer.
