

uniFLOW  
ONE

## Device-Based Licensing for uniFLOW Solutions

uniFLOW has evolved into an offering that has transformed the traditional server-based print and scan environment into a highly flexible system that can be on premise, in the cloud, or a blended hybrid of uniFLOW<sup>1</sup> and uniFLOW Online as a subscription! A simple and flexible approach to providing secure print and document workflows, uniFLOW ONE helps businesses bridge the digital gap to the future.

### Key Benefits of uniFLOW ONE

Productivity

Security Features

Cost Savings

## Features and Benefits

Help enhance employee productivity with the following benefits:

- Single sign-on for scanning and personalized workflows
- Mobile printing
- Modifying jobs at your Canon device prior to printing

Help prevent unauthorized use of devices and keep valuable and confidential information safe with these uniFLOW security features:

- Access Control
- Tracking
- GDPR Compatibility

With the cost-saving benefits of uniFLOW, administrators can:

- Track and analyze printing, copying, faxing, and scanning usage
- Set rules for cost-effective printing
- Track and audit costs

See how the features and functions of uniFLOW can benefit your business. Try our three-month<sup>2</sup> uniFLOW Online trial!

<sup>1</sup> Available to Education and Government customers with prior approval.

<sup>2</sup> The start date within a month determines the trial mode duration.
