

The Power of uniFLOW Meets ETHERFAX®

Connecting uniFLOW¹ with ETHERFAX² can offer a virtually seamless, cloud-based faxing solution that helps users simplify document workflows by limiting the need for traditional analog fax lines and modems. This modernization is designed to help organizations enhance workflow productivity that rely heavily on document exchange, such as healthcare, government, legal, and education institutions.

This integration can be supported by an extensive range of Canon devices, including compatible Canon MEAP enabled imageRUNNER ADVANCE DX, imageFORCE,³ and imagePRESS Lite devices.

EFFICIENT

Send, receive, and print faxes directly through the ETHERFAX service² without the need for analog phone lines.

SOPHISTICATED

Sophisticated digital communication platform with security features.

SCALABLE

Transition to a modern digital fax architecture that can grow with your business needs.

How It Works

A simplified 5-step workflow for users.

¹ ETHERFAX Service not included. ETHERFAX subscription must be purchased separately. Contact ETHERFAX for details at sales@etherfax.net.

² uniFLOW subscription not included. Subscription required. Subject to third-party provider's terms and conditions.

³ Refer to the imageFORCE Reference Guide for a list of compatible MEAP-enabled Canon imageFORCE devices.
